

**MY
NEW F45.**

SPECIFICATION AND OPTIONS

WE INVENTED THE SLIDING TABLE SAW. NOW WE ARE REINVENTING IT.

YOUR NEW ALTENDORF.

The world has Wilhelm Altendorf to thank for the sliding table saw. His invaluable invention, which first saw the light of day in 1906, enabled users to make a straight trim cut in a plank – an essential precursor to the 90° crosscut – for the first time. Woodworkers all over the world have been reaping the benefits of this remarkable invention ever since, with more than 150,000 Altendorf machines sold worldwide to date. Unsurprisingly perhaps, the intervening years have also seen the Altendorf name become synonymous with the sliding table saw. The new generation redefines the Altendorf F45 all over again: new design, the latest technology, new ease of use and unrivalled precision.

CONTENTS

THERE IS JUST ONE MODEL – THE F 45.

YOUR NEW ALTENDORF.

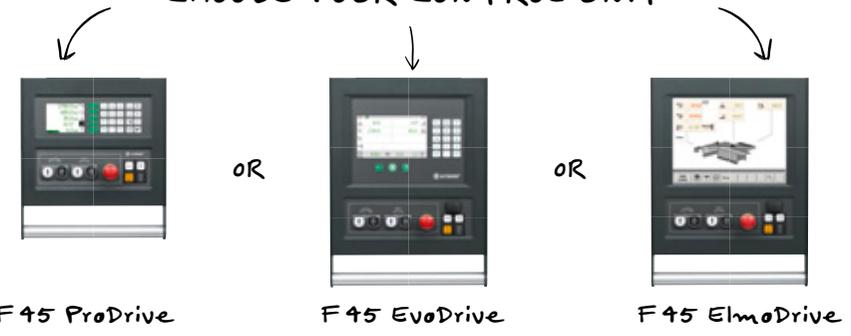

The new F 45 is a masterpiece of technology and design. The comprehensively redesigned machine frame combines absolutely unprecedented torsion resistance with extremely low levels of vibration, while the smooth front and clear foot space on the floor enable you to operate closer to the machine and the workpiece. The famously smooth-running sliding table, which has received a number of design tweaks, remains the undisputed benchmark for precision cutting and minimal maintenance. The crisp new industrial design underlines the distinctive quality of the Altendorf brand: It is an approach that brings together distinctive design and timeless aesthetics – recognised with the iF design award 2016. Altendorf's new generation is unique in that we now have just the one model: the F 45. But this one model comes with a choice of three completely new control unit designs, each of which enables you to control up to four axes from the centrally-positioned eye-level control panel. The only decision that remains for you to make is this: Which control unit shall it be?

YOUR NEW F45.

CHOOSE YOUR CONTROL UNIT

CHOOSE YOUR OPTIONAL EXTRAS

OUTSTANDING DESIGN MEETS OUTSTANDING TECHNOLOGY.

BASIC SPECIFICATION

- ▶ Motorised rise/fall and tilt adjustment (0–46°) for main saw blade with automatic cutting height correction when the saw blade is tilted

- ▶ Eye-level control unit, swivel-mounted

- ▶ Sliding table, table length 3,000 mm

- ▶ Rip fence, manual adjustment using graduated scale, includes fine adjustment, cutting width 1,000 mm

- ▶ Crosscut fence with fixed 90° angle, manual adjustment using graduated scale up to 3,200 mm

- ▶ Maximum saw blade projection 150 mm, maximum saw blade diameter 450 mm

- ▶ Motor rating 4 kW (5.5 HP) with one speed (4,000 rpm)

- ▶ AKE tool clamping system for the main saw blade

- ▶ Working height 91 cm

MACHINE IN BASIC SPECIFICATION WITH CONTROL UNIT

M18150	F 45 ProDrive
M18151	F 45 EvoDrive
M18152	F 45 ElmoDrive

WORKING HEIGHT

M44250	88 cm
M44260	85 cm

Although the working heights for sliding table saws have kept rising in recent years, there has also been international demand for lower machines from Altendorf. We know that ergonomics is individual, and we have responded to this fact of life: We offer three working heights for the F 45 around the world: 85, 88 and 91 cm.

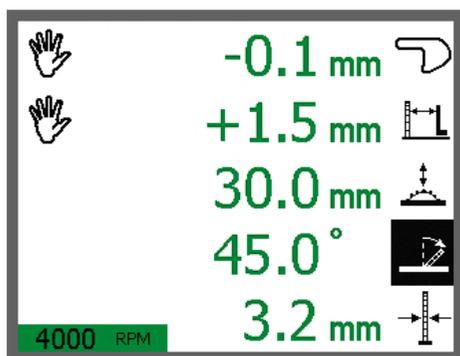

The photo shows your F45 desired specification with CNC crosscut fence UNO 90, CNC rip fence and toolbox.

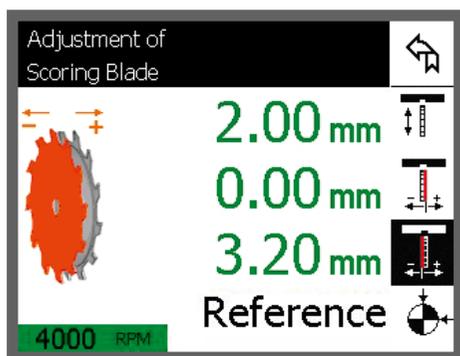

F45 ProDrive – CONTROL UP TO FOUR AXES AND MORE!

The swivel-mounted control unit offers unprecedented ease of use, clarity, safety and convenience. Even this entry-level option provides control of all four axes. All values and functions are displayed clearly on the screen, which has a 90 mm diagonal. Use the green keys to access the saw blade height and tilt functions (up to 46° in either direction) plus, depending on package configuration, the CNC rip fence, crosscut fence, scorer, VARIO (infinitely variable speed control between 2,000 and 6,000 rpm) options and the additional groove function. Use the white data entry keys to enter the corresponding values. Obviously the control unit can only control the hardware you have installed, so choose precisely the configuration options you need for your Altendorf.

Groove function/concealed cuts

F 45 ProDrive

- ▶ Motorised rise/fall and tilt adjustment (up to 46° in either direction *)
for main saw blade with automatic height correction and digital displays
- ▶ Motorised rip fence adjustment*
- ▶ Motorised adjustment of the UNO 90 CNC crosscut fence*
- ▶ Automatic position correction for rip fence and crosscut fence when saw blade tilted
- ▶ Digital speed display or infinitely variable speed control (VARIO)
- ▶ Motorised scorer unit, two or three axes*
- ▶ Continuous precision axis control using +/- keys*
- ▶ Control of the vacuum clamping system in the sliding table*
- ▶ Easy axis calibration
- ▶ Machine diagnostics
- ▶ Operating hours counter
- ▶ USB interface
- ▶ "Back" function to recall last set of dimensions entered
- ▶ Memory for 99 cutting programmes
- ▶ Groove function: rip fence automatically moves through sequence of positions necessary to realise the groove

MACHINE IN BASIC SPECIFICATION WITH CONTROL UNIT

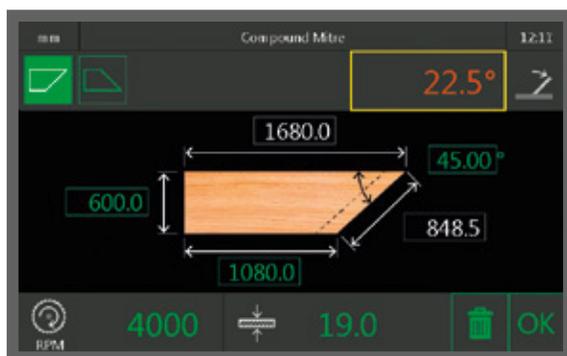

M18150 F 45 ProDrive

*optional accessory

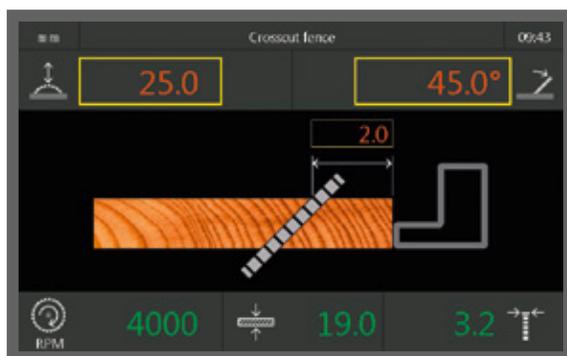

F 45 EvoDrive – EFFICIENCY-BOOSTING FEATURES ALREADY ONBOARD.

The new F 45 EvoDrive has a 7" touch screen with separate keyboard for entering numerical dimension specifications. It can control up to four axes, including saw blade tilt to either side. What distinguishes it from the F 45 ProDrive is further application technology: the F 45 EvoDrive defines inside and outside dimensions automatically from the material thickness data supplied, for example. It also brings you the pleasure of additional groove, incremental dimension and bevel rip features, which should simplify your work considerably – as, indeed, should the compound mitre function and the tool management system. The F 45 EvoDrive lets you store 999 programmes for rapid retrieval via the keyboard too. The green navigation keys enable you to find your way easily through the functions, go to the main menu or jump back a page. Another particularly useful feature is that the brightness of the display adjusts to suit different ambient lighting conditions to make sure you always have a good view of everything you need to be able to see. Try the F 45 EvoDrive and discover how we have already done much of the hard work for you!

Compound mitre

Bevel rip

Groove

F 45 EvoDrive

- ▶ The F 45 EvoDrive includes all of the functions of the F 45 ProDrive control unit (pages 8 + 9) and more
- ▶ Automatic conversion of inside to outside dimensions for the rip fence and crosscut fence as a function of material thickness and set angle
- ▶ Compound mitre function with automatic calculation of missing angles/dimensions
- ▶ Enhanced tool management
 - Scorer position memory (three-axis scorer)*
 - Storage of master blade thickness and cutting width of the main tool
 - Storage of main tool speed
 - Memory for a maximum of 100 tools
- ▶ Additional functions
 - Groove function: rip fence automatically moves through sequence of positions necessary to realise the groove
 - Incremental dimension function: cutting sequences with identical distance at the rip fence, calculated on both sides of the saw blade
 - Bevel rip: the required finished size is achieved by cutting away the excess once the angle of the edge has been entered
 - Memory for 999 cutting programmes

MACHINE IN BASIC SPECIFICATION WITH CONTROL UNIT

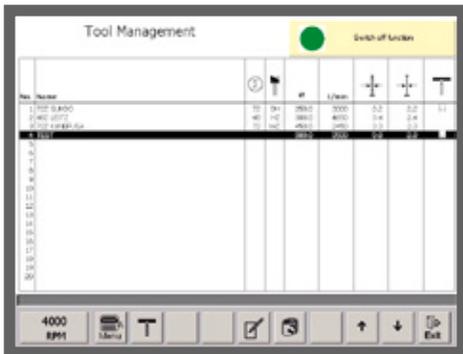

M18151 F 45 EvoDrive

*optional accessory

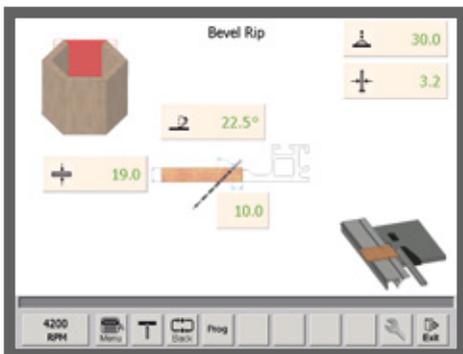

F 45 ElmoDrive – CONTROL TECHNOLOGY WITHOUT EQUAL.

The F 45 ElmoDrive incorporates the most advanced and comprehensive control technology in existence for sliding table saws. Positioned at eye level, it combines optimal ease of use and presentation with practical and ergonomic operation. The calculator, geometric shapes, compound mitre and tool management functions are easily accessed and clearly presented on the 12" touch screen. The F 45 ElmoDrive of course gives you motorised control of all axes and allows you to tilt the saw unit to either side. The lower part of the display can be used to store functions you return to regularly (in the manner of a PC desktop) for even more efficient operation. The F 45 ElmoDrive is the only control unit that can be linked with a cut optimisation package. All in all, nothing comes close to the F 45 ElmoDrive for control technology. Day after day after day.

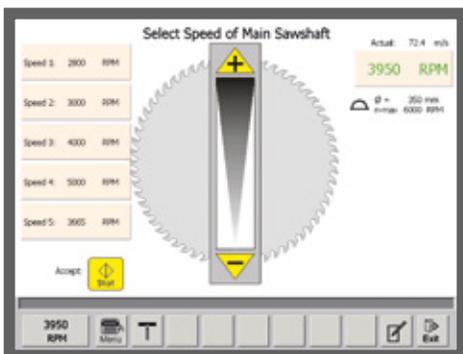

Tool management

Bevel rip

Rotational speed menu

F 45 ElmoDrive

- ▶ The F 45 ElmoDrive includes all of the functions of the F 45 ProDrive and F 45 EvoDrive control units (pages 8 – 11) and more
- ▶ Calculator function, with results transferred to the relevant axes
- ▶ Geometric shapes with automatic calculation of missing angles/dimensions
- ▶ Mitre joints between pieces of different widths with automatic calculation of missing angles/dimensions
- ▶ Interface for connecting to a PC, for example to allow running of cut optimisation programmes*
- ▶ Memory for 9999 cutting programmes

DRIVES: HIGH TORQUE WITH POWER TO SPARE.

Drives for one-way tilt with manual speed adjustment. The motors are manufactured specially to Altendorf's specifications and have been optimized for use in sliding table saws. They provide up to 20% more torque than conventional electric motors with no increase in power consumption. The three-speed units operate at 3,000, 4,000 and 5,000 rpm and are adjusted manually.

- M51050** 4 kW (5.5 HP) single speed
- M51100** 5.5 kW (7.5 HP) three speeds
- M51101** 7.5 kW (10 HP) three speeds
- M51102** 11 kW (15 HP) three speeds

basic specification

VARIO drive for one-way tilt: This drive offers infinitely variable speed control between 2,000 and 6,000 rpm. Matching speed precisely to the material increases not just cutting quality, but also the service life of your saw blades, which, in turn, helps to reduce your costs.

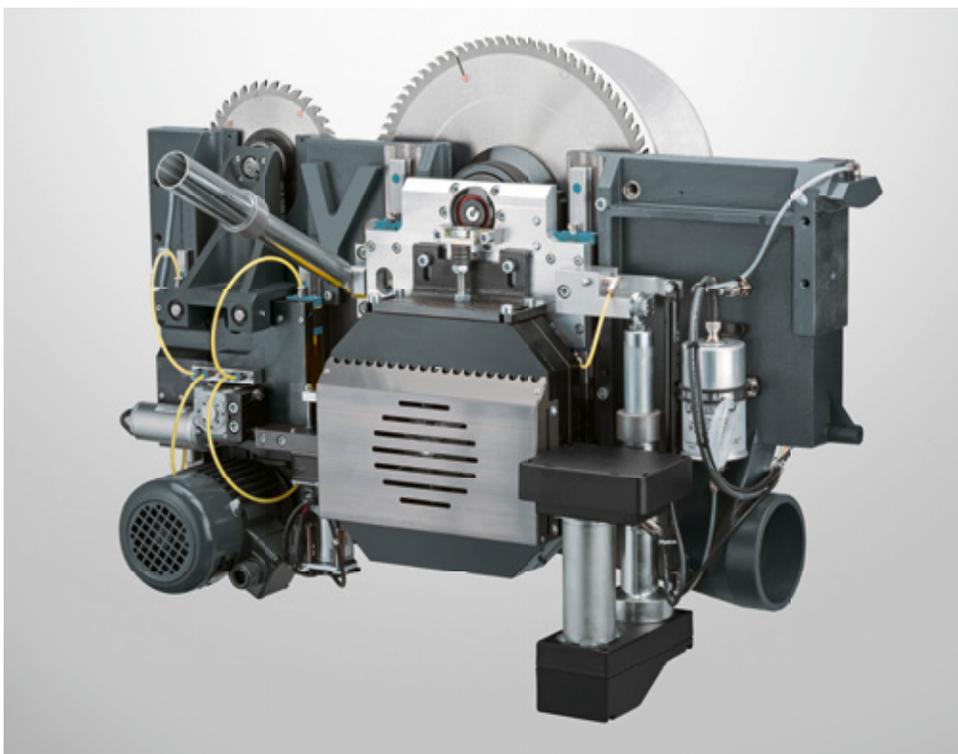

- M51103** 5.5 kW (7.5 HP)
- M51104** 7.5 kW (10 HP)

Extended cutting height for one-way tilt: This option is fitted out for one-way tilt with a large extraction hood for a maximum saw blade diameter of 550 mm and a saw blade projection of no greater than 204 mm. The maximum saw blade diameter when used in combination with a scorer unit is 500 mm, which corresponds to a cutting height of 179 mm. Only in combination with a motor rated at least 5.5 kW (7.5 HP).

M64080

Special voltages on request.

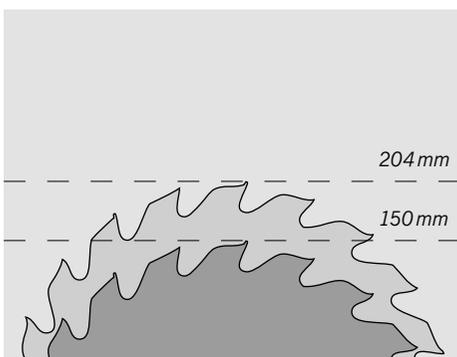

TWO-WAY TILT: ALWAYS PRACTICAL.

Saw unit tilts up to 46° to either side. The ability to tilt the saw unit up to 46° to either side makes the F45 an even more versatile cutting machine. There is no need to adjust the extraction hood either, as it simply follows the saw unit. The entire movement, from full tilt one way to full tilt the other, takes just 12 seconds. One of the main applications for the two-way tilt function is the sawing of internal mitres, which can be done easily and safely using the crosscut fence. Just as straightforward are simple bevel cuts and compound mitres. VARIO infinitely variable speed control (2,000–6,000 rpm) makes operation even faster and more user-friendly, while the extremely compact design of the synchronous motor allows it to be linked to the saw shaft with a rigid connection, eliminating at a stroke the potential for faults associated with indirect belt-based linkages. The advanced technology built into this motor means that it already satisfies the requirements for energy efficiency class IE4 and has an enormous power reserve in excess of 120%. The tilt adjustment feature, which is firmly anchored at the centre of mass of the saw unit, has already proven its mettle 10,000 times over in the one-way tilting F45: in short, it simply does not twist! The maintenance-free tilt quadrants use a tongue and groove connection system with automatic lubrication.

M18500 5 kW (6.8HP), peak power 11 kW, with Vario

M51059 Additional charge for 6.5 kW (8.8HP), peak power 15 kW, with Vario

Extended cutting height for two-way tilt:

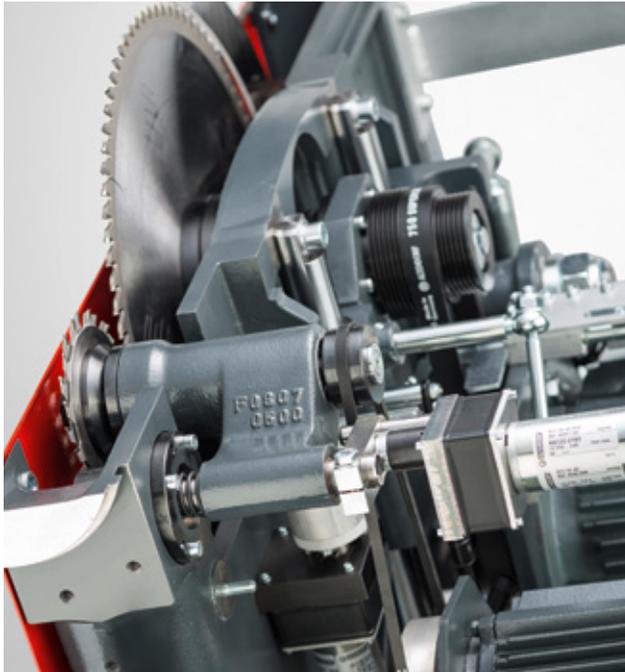

The maximum saw blade projection of 204 mm is achieved with a saw blade diameter of 550 mm, also with a scorer unit. We recommend you choose the more powerful 6.5 kW (8.8HP) motor.

M64079

Special voltages on request.

SCORER UNITS: CHIP-FREE AND SAFE.

Two-axis scorer unit. With motorised vertical and lateral adjustment, programmable scorer blade height, rapid deploy and retract and 0.75 kW (1 HP) motor running at 8,200 rpm with one-way tilt or 6,000 rpm with two-way tilt. For retrofitting only to scorer-unit-ready machines.

M24030 One-way tilt, $\varnothing = 120$ mm

M24034 Two-way tilt, $\varnothing = 180$ mm

M24038 Scorer-unit-ready upgrade

Three-axis scorer unit (RAPIDO Plus). With motorised vertical, lateral and cutting width adjustment, including saw blade, programmable scorer blade height, rapid deploy and retract, saw blade width display and 0.75 kW (1 HP) motor running at 8,200 rpm with one-way tilt or 6,000 rpm with two-way tilt. For retrofitting only to scorer-unit-ready machines.

M24021 One-way tilt, incl. parking position and LED illumination, $\varnothing = 120$ mm

M24036 Two-way tilt, $\varnothing = 180$ mm

M24038 Scorer-unit-ready upgrade

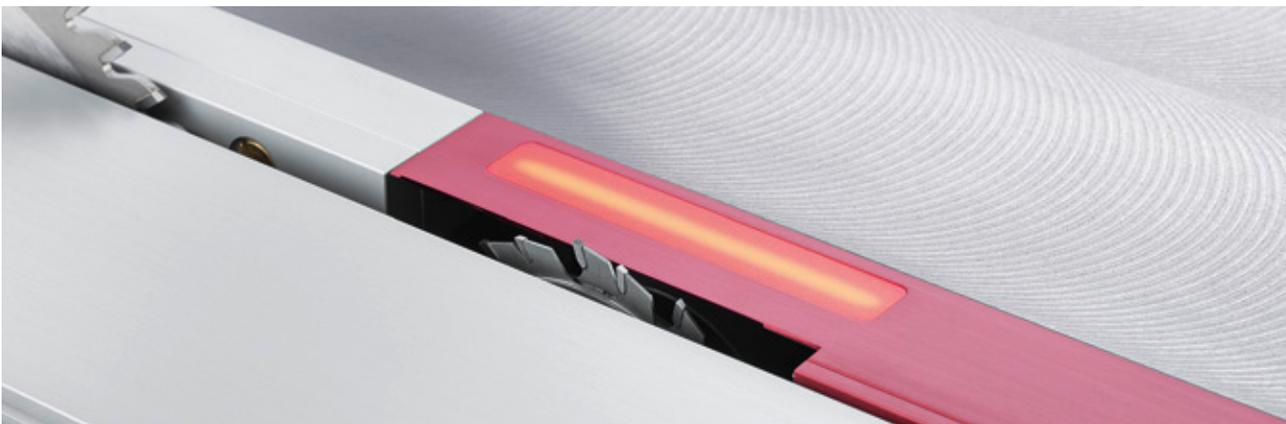

Parking position: The new unit allows the scorer to be moved out of the working area to a much better protected standby position, allowing it to be “parked” safely out of the way when processing solid wood, plastic materials or even aluminium. And since the scorer is always there, but never in the way, it is now also possible to use up to 550 mm-diameter main saw blades without having to plan in additional setup time for the scorer unit. This option is only available for machines with one-way-tilting saw units.

RAPIDO scoring system. The scorer ensures chip-free undersides when working with laminated panels. The RAPIDO system makes adjusting the cutting width straightforward and enables this step to be completed in no more than three minutes. Compared to working with shims, where you have to take the blade off the machine to alter its width, the RAPIDO saves up to 30 minutes, as the blade stays on the machine during adjustment. Adjustment is continuous and precise, so the RAPIDO can be fine-tuned to match the cutting width of any main blade. Range: 3–3.8 mm.

M24031 One-way tilt, $\varnothing = 120$ mm

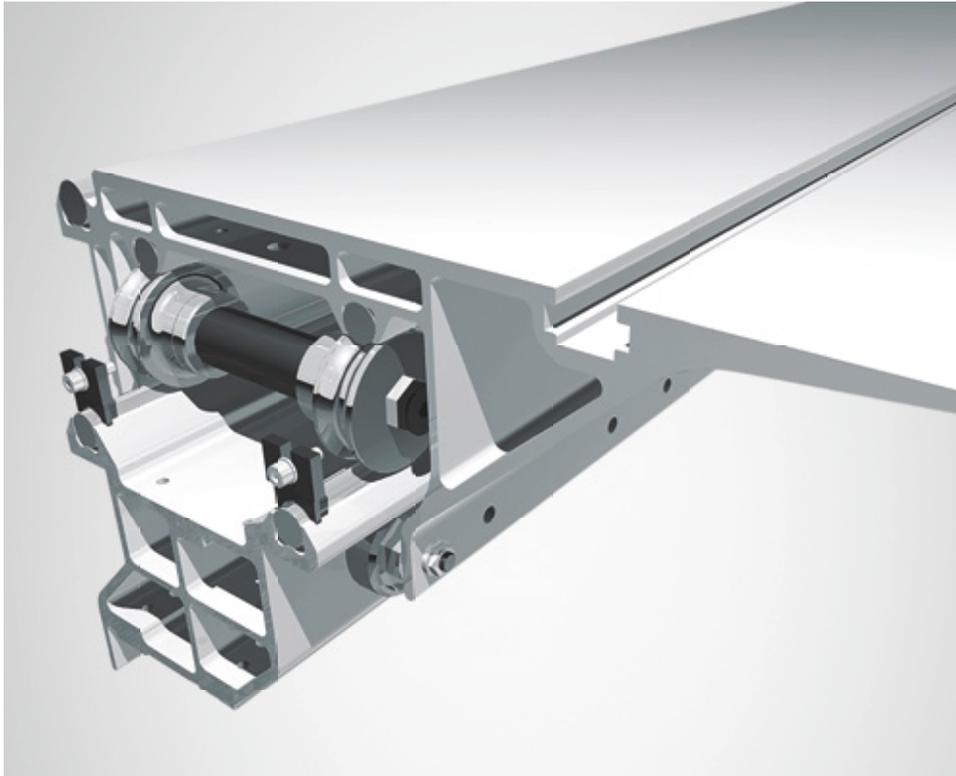

M24035 Two-way tilt, $\varnothing = 180$ mm

LED illumination. Particularly energy-efficient LEDs render the hazard area around the scorer highly visible.

M24037

ADMIRE FOR ITS SMOOTH RUNNING, PRECISION AND SAFETY.

Sliding table. The Altendorf sliding table is renowned for its smooth, precise running. It is infinitely adjustable and can be locked in whatever position required. The large dumbbell rollers guide the moving table with absolute precision between the hard-chromed guide bars. And it retains this ease of movement even after decades of hard work, dust and dirt. The hollow multi-chamber design gives great torsion resistance and rigidity.

- M34201** Table length 2,250 mm
- M34203** Table length 3,000 mm
- M34204** Table length 3,200 mm
- M34205** Table length 3,400 mm
- M34206** Table length 3,800 mm, with support leg
- M34207** Table length 4,300 mm, with support leg
- M34208** Table length 5,000 mm, with support leg

basic specification

- M37003** On/off switches on sliding table
(not in combination with TIP-SERVO-DRIVE)

- M41010** Table extension 840 mm
- M41011** Table extension 1,200 mm

basic specification

Strengthened table extension/table expansion: This option delivers what the massive appearance promises. The heavy design was created with tremendous use in mind. A steel frame adds extra strength to the rigidity and stiffness of the proven CDF edition. As a result, it can easily handle really heavy workpieces thrown its way.

- | | |
|--|--|
| M41030 Table extension 840 mm | M41035 Table expansion 1,000 mm |
| M41031 Table extension 1,200 mm | M41036 Table expansion 1,300 mm |
| M41032 Table extension 1,600 mm | M41037 Table expansion 1,600 mm |
| M41033 Table extension 2,000 mm | |

Vacuum clamping system in the sliding table. Altendorf is the first to apply proven vacuum clamping technology to sliding table saws. The system, which is integrated into the sliding table itself, has at its heart a powerful vacuum pump that generates a vacuum via pairs of suction grippers arranged in the sliding table. The individual suction areas along the sliding table can be controlled individually via the buttons. The outer vacuum row can still be deactivated, allowing you to adjust the vacuum so that it optimally suits the workpiece. The workpiece has a minimum width of 100 mm. Wooden, plastic and aluminium panels remain securely in position on the sliding table throughout even complex cuts such as angles, long mitres and cuts to an outside dimension. Another touch of a button is all it takes to release the workpiece. Vacuum clamping improves reliability, precision and convenience and helps to eliminate manual operating errors. All table lengths feature the same six pairs of suction grippers. Additional pairs of suction grippers are available on request. Not compatible with TIP-SERVO-DRIVE.

M64095

TIP-SERVO-DRIVE. The motorised servo drive for the sliding table takes the physical strain off the operator's body, the back in particular, making it very easy to move even the heaviest of workpieces back and forth during cutting. The electronic sensor control handle responds to the lightest of touches, The result: You can maintain an upright and relaxed posture throughout the cutting operation. The TIP-SERVO-DRIVE cannot be used in combination with the on/off switches on sliding table option or the vacuum clamping in sliding table option.

M35209

Pneumatic pressure beam. This is an ideal solution for securely retaining workpieces of up to 80 mm thick, making it particularly useful when working with long and thin materials such as veneers. It comes in two separately controlled pieces. A 6 bar pneumatic connection is required.

- M64070** For 2,250 mm table,
clamping length 1,975 mm
- M64071** For 3,000 mm table,
clamping length 2,725 mm
- M64072** For 3,200 mm table,
clamping length 2,925 mm
- M64073** For 3,400 mm table,
clamping length 3,125 mm
- M64074** For 3,800 mm table,
clamping length 3,525 mm

CROSSCUT FENCES WITH FIXED 90° ANGLE: EVERYDAY UTILITY AND CONVENIENCE.

DIGIT L: for 1/10 mm accuracy when setting the length dimension. The display shows all stop settings applied. The central measuring and display unit calibrates the entire system in one operation. Two flip stops with fine adjustment, two batteries and a charger are included.

M44401 Stops to 2,500 mm

M44403 Stops to 3,200 mm

Additional cross slide with double floor support rollers. This accessory is well worth considering if you plan to be sizing large and heavy workpieces of up to 250 kg. Recommended floor rail: flat steel, 10 x 60 mm (length = 2x table length + 900 mm). The floor rail is to be provided by the customer.

M64056

Crosscut fence with fixed 90° angle. The crosscut fence with fixed 90° angle earns its name every day helping out with precision cuts on workpieces of different lengths and formats. The stop can be slid into place easily without lifting. Two flip stops are included.

M44400 Stops to 2,500 mm

(only in combination with sliding table to max. 3,800 mm)

M44402 Stops to 3,200 mm

basic specification

Pull-out cross slide extension. This option makes it easier to cut longer/wider workpieces and increases the width of the support area for the manual crosscut fence.

M64085

CROSSCUT-MITRE FENCES: PRECISION, PLAIN AND SIMPLE.

Crosscut mitre fence. This patented Altendorf fence, with integral length compensation, makes it easier to perform bevel cuts and mitre cuts precisely in one function. The set angle can be adjusted continuously over a range of 49° with a graduated scale and the robust, free-sliding zero-play flip stops can be positioned individually at any distance up to a maximum of 3,500 mm. The outer stop docks into the roller-stabilised telescopic extension for distances longer than about 1,700 mm. The integral length compensation feature enables the fence to be moved precisely to any required position when cutting mitres with no need of additional length compensation aids: simply slide the fence rule to the desired angle using the scale and then set the flip stop to the length required.

M44404 Stops to 3,500 mm

DIGIT L: for 1/10 mm accuracy when setting the length dimension. The display shows all stop settings applied. The central measuring and display unit calibrates the entire system in one operation. Two flip stops with fine adjustment, two batteries and a charger are included.

M44406 Stops to 3,200 mm

DIGIT LD: for 1/10 mm accuracy when setting the length dimension. The display shows all stop settings applied. The central measuring and display unit calibrates the entire system in one operation. and displays angles in digital format, enabling a level of precision of $\pm 1/100^\circ$. The length dimension is calculated automatically as a function of the mitre angle. Two flip stops with fine adjustment, two batteries and a charger are included.

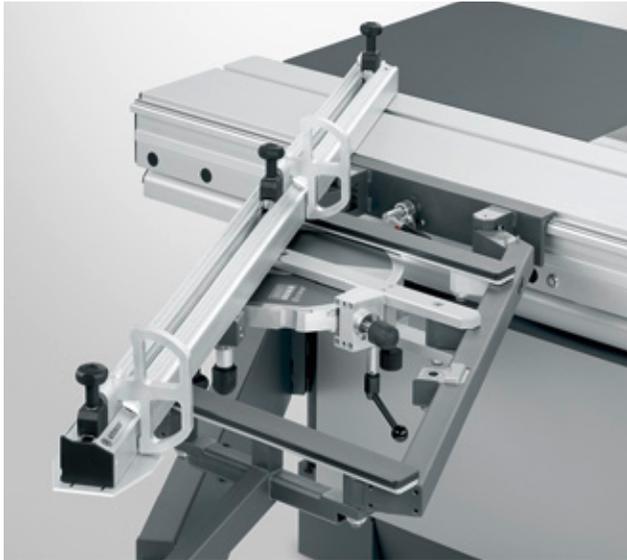

M44408 Stops to 3,200 mm

Pull-out cross slide extension. This option makes it easier to saw longer/wider workpieces and increases the width of the crosscut-mitre fence. It extends to a distance of 650 mm.

M64085

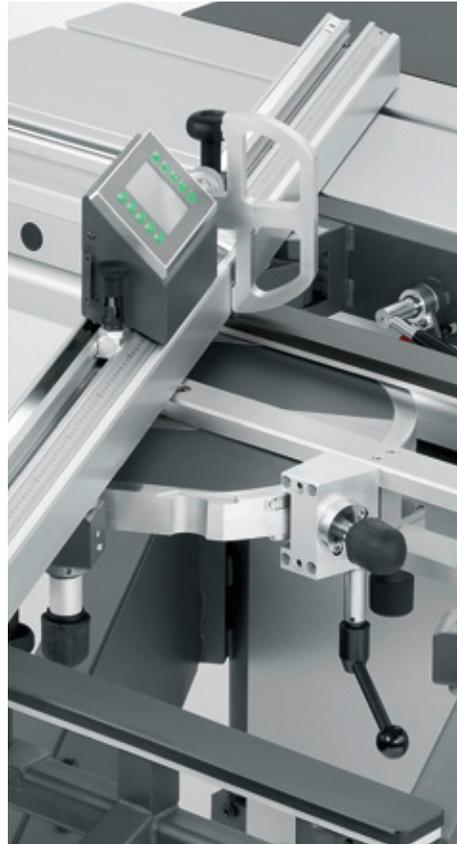

THE PARALLELOGRAM CROSS SLIDE: STRAIGHTFORWARD IN USE.

Parallelogram cross slide (PQS). Accurate and wear-free, this system features a robust 90° locking mechanism that ensures the right-angle position is absolutely reproducible. The fence can be angled by up to 47° in either direction. The integrated digital display shows the set angle with an accuracy of 1/100° for optimal precision. Also included is length compensation, which is simply taken from a scale when the fence is angled. Two flip stops are included.

M44409 Stops to 3,500 mm

DIGIT L: for 1/10mm accuracy when setting the length dimension. The display shows all stop settings applied. The central measuring and display unit calibrates the entire system in one operation. Two flip stops with fine adjustment, two batteries and a charger are included.

M44411 Stops to 3,200 mm

DIGIT LD: for 1/10mm accuracy when setting the length dimension. The display shows all stop settings applied. The central measuring and display unit calibrates the entire system in one operation, and angles are displayed in digital format, enabling a level of precision of $\pm 1/100^\circ$. The length dimension is calculated automatically as a function of the mitre angle. Two flip stops with fine adjustment, two batteries and a charger are included.

M44412 Stops to 3,200 mm

Cross slide extension. The fixed cross slide extension (up to 650 mm) with two separate supports makes it easier to saw wider/longer workpieces.

M64086

CNC CROSSCUT FENCES: MOTORISED FOR CONVENIENCE.

2425

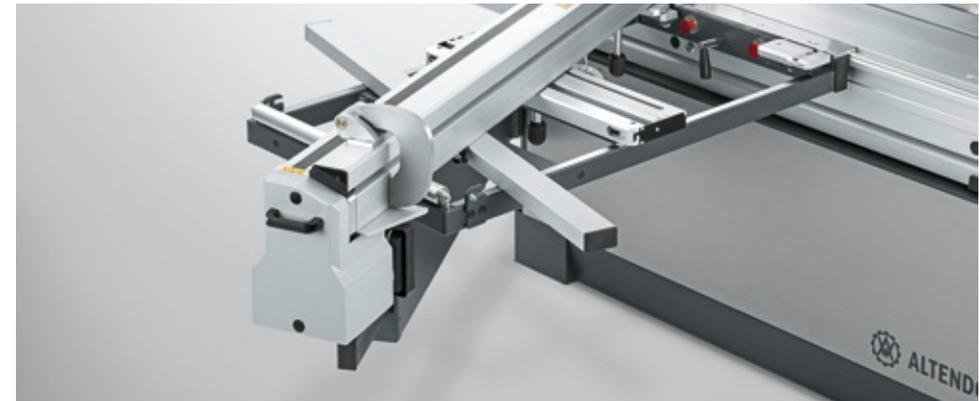

UNO 90 CNC crosscut fence. Fixed in the 90° position, the UNO 90 CNC crosscut fence enables efficient and precise execution of right-angled cuts. The flip stop has a maximum travel of 1,900 mm as standard, but the extension supplied can be fitted manually to give a longer fence with a maximum dimension of 2,900 mm if required.

M44413 Stops to 2,900 mm

DUO 90 CNC crosscut fence: This fence features two CNC flip stops with a maximum travel of 3,500 mm. It is fixed in the 90° position. Workpieces can be positioned against either side of the fence. The DUO 90 CNC crosscut fence is not compatible with the F 45 ProDrive control unit.

M44414 Stops to 3,500 mm

DUO FLEX CNC crosscut-mitre fence. The DUO Flex fence can be angled manually by up to 47° for easy and convenient bevel and mitre cuts. It includes automatic length compensation and two motorised flip stops (travel to 3,500 mm). It is not necessary to lift the fence to switch between the front and rear positions on the cross slide. The flip stops can be used on both sides. This means you can make mitre cuts to the inside or outside dimension and cut compound mitres in a single operation. The DUO Flex CNC crosscut-mitre fence is not compatible with the F 45 ProDrive control unit.

M44415 Stops to 3,500 mm

Cross slide extension. The cross slide extension makes it easier to saw wider/longer workpieces. Total extension to 650 mm.

M64085 UNO 90 (pull-out)

M64087 DUO 90 (fixed)

M64088 DUO Flex (pull-out)

THE ALTENDORF RIP FENCES: PRECISION WITHOUT EQUAL.

Rip fence with manual fine adjustment. Setting the fence is easy; the precision fine adjustment makes for great accuracy. The hard chrome-plated round bar system ensures the fence moves smoothly. The rip fence drops down clear of the machine table level to free up extra space for dividing large panels.

- M44420** Cutting width 800 mm
- M44421** Cutting width 1,000 mm
- M44422** Cutting width 1,300 mm
- M44423** Cutting width 1,600 mm

basic specification

Rip fence with DIGIT X: Digital cutting width display for the rip fence with manual fine adjustment. This electronic measuring system ensures rapid and precise positioning of the rip fence. Recurring dimensions can be reproduced exactly and checked on the DIGIT X display. The correction for the rip fence position is shown digitally on the machine control unit's display when working with the saw blade tilted. The system is not subject to wear and is unaffected by dust. Dimensions are corrected automatically when the fence is switched between the upright and the flat position.

- M44430** Cutting width 800 mm
- M44431** Cutting width 1,000 mm
- M44433** Cutting width 1,300 mm
- M44434** Cutting width 1,600 mm

CNC rip fence. The CNC rip fence has a traverse speed of 250 mm/s and an accuracy of $\pm 1/10$ mm. The high-precision five-point recirculating ball spindle system needs little maintenance and, along with the motor, is well protected by its integration into the aluminium profile. The fence detects its position automatically, especially in the danger area around the saw blade, and has an emergency cut-out to prevent the risk of crushing. Dimensions are corrected automatically when the fence is switched between the upright and the flat position or when working with the saw blade tilted.

M44440 Cutting width 800 mm

M44441 Cutting width 1,000 mm

M44443 Cutting width 1,300 mm

M44444 Cutting width 1,600 mm

EVEN MORE WAYS TO SIMPLIFY YOUR WORK.

Toolbox. The practical toolbox is a drawer capable of holding up to six tool carriers (maximum saw blade diameter 550 mm) ready for use. Four tool carriers are included in the standard scope of supply. This option requires a minimum sliding table length of 3,000 mm.

M44453

STEG. The STEG second support makes sizing large panels easier.

M44452

Clipboard. The clipboard mounted at eye level directly on the control unit is convenience itself. Parts lists are secured with a clamp, enabling you to keep a close eye on your jobs or other working documents as you cut. Thanks to the integrated storage ledge, you will always have your tools accessible.

M62003

Front support roller. The 300 mm-wide front support roller is particularly useful when cutting longer workpieces on the rip fence. It can be folded down through 90° in one movement to stow under the sliding table (minimum length 3,000 mm) when not required.

M44450

DOUBLE-SIDED MITRE FENCES: TWICE AS USEFUL.

DUPLEX double-sided mitre fence. DUPLEX fences make it possible to realise bevel cuts at any angle between 0 and 90° with speed and precision. Set the DUPLEX to 45° and a mitre cut can be made on both sides of the workpiece without resetting the two fences. Dimensions of the flip stops are set using a measuring scale and magnifier. All DUPLEX fences can be positioned anywhere along the entire length of the sliding table.

M64060 Stops to 1,350 mm
M64061 Stops to 2,150 mm

DUPLEX D. The DUPLEX D provides the same functionality as the DUPLEX plus a digital angle display that shows values to an accuracy of 1/100°.

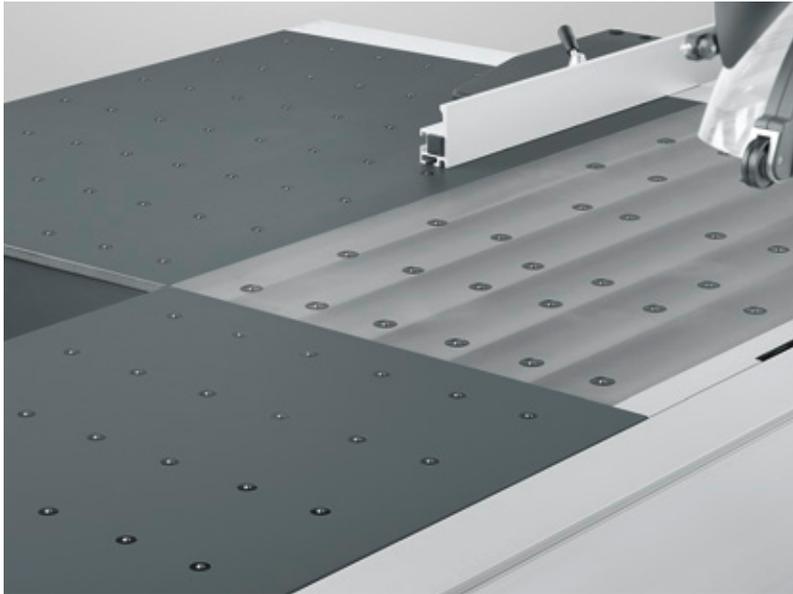

M64062 Stops to 1,350 mm
M64063 Stops to 2,150 mm

DUPLEX DD. The DUPLEX DD has been patented worldwide. Its greatest benefits are that it not only eliminates tedious calculations and measurement checking completely, but even removes the need for test cuts. The high precision DUPLEX DD electronics incorporate automatic length compensation and calculate the distance to the stops as a function of the angle on both sides of the fence and display both figures digitally. Digital angle display and digital length display for adjustment, automatic length compensation. Batteries included.

M64064 Stops to 1,350 mm
M64065 Stops to 2,150 mm

RETAIN WORKPIECES SECURELY FOR SAFER WORKING.

Air cushion table: The first air cushion table is now available as an optional feature for the F 45. The compressed-air unit operates on the right-hand side of the saw blade to make work at the rip fence easier. The air cushion reduces the frictional resistance between the material and the machine table by up to 80%, which not only makes handling heavy workpieces much easier, but also, being an essentially contact-free technology, greatly reduces the risk of the workpiece being scratched as it passes over the machine table.

M64186 Air cushion table

Table extension/table expansion with air cushion table: With this addition to air cushion machine tables, the entire width and length of heavy and delicate workpieces are protected from scratching by an air cushion. The air supply to the machine is provided independently to add more flexibility.

M41040 Table extension with air cushion table 840 mm

M41042 Table extension with air cushion table 1,600 mm

M41046 Table expansion with air cushion table 1,300 mm

Pneumatic quick-action clamp. Secures the workpiece in place on the sliding table. Activated by radio remote control, the quick-action clamp exerts a clamping force of up to 1,000 N. The workpiece is held rock solid against the crosscut fence. It can clamp workpieces up to 170 mm thick. Available with one or two clamping units. Pneumatic connection to be provided by customer (6 bar).

M64091 With one clamping unit (clamping range 0–90 mm)

M64092 With two clamping units (clamping range 0–90 mm)

M64093 With one clamping unit (clamping range 80–170 mm)

M64094 With two clamping units (clamping range 80–170 mm)

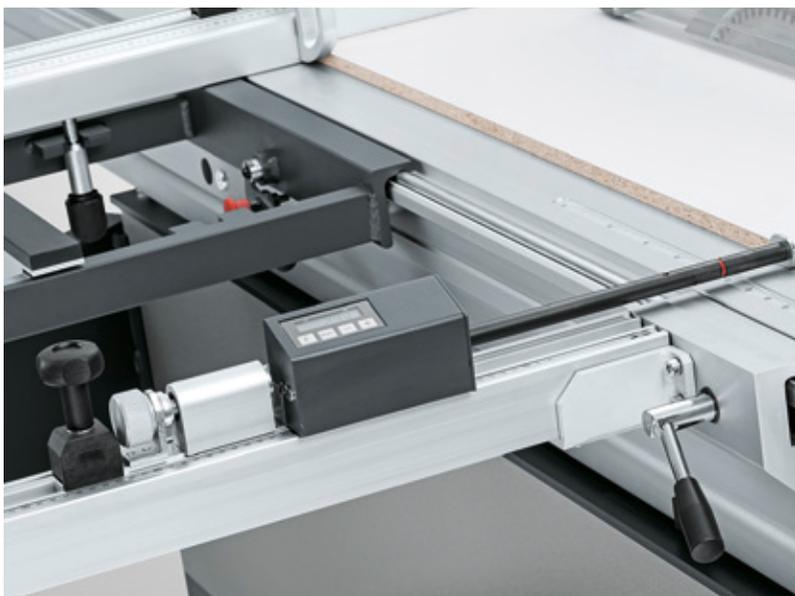

M64184 With one clamping unit (clamping range 120–210 mm)

M64185 With two clamping units (clamping range 120–210 mm)

Manual quick-action clamp. The alternative to the pneumatic clamp. The manual quick-action clamp can be positioned on the sliding table easily and is equally easy to fix in place, ensuring the workpiece is reliably retained on the table and against the crosscut fence. It has a clamping height of up to 200 mm and provides extra safety at very little extra cost.

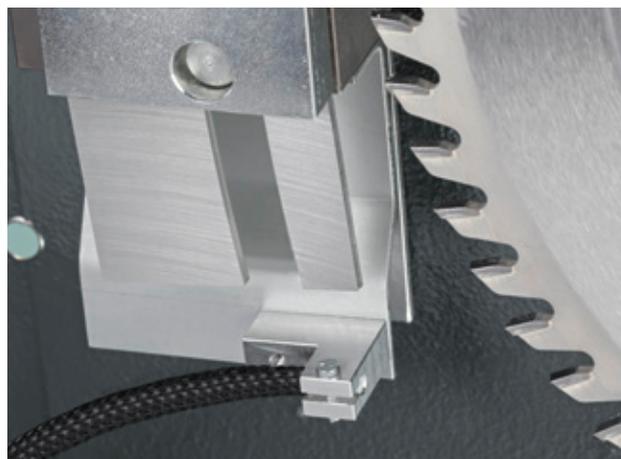

M64090

PALIN: Used in combination with the crosscut fence, the PALIN makes it possible to complete parallel and conical cuts in long, narrow workpieces with absolute accuracy. The measuring system butts against the side of the workpiece rather than the end, so no cutting length is lost. The operator is able to make quick and absolutely parallel cuts in parts of different lengths, even without moving the PALIN. One other benefit: With the measuring system removed, the fence acts as an additional workpiece support. Also available is the PALIN D model, which offers digital measurement display and fine adjustment. Adjustment range 80–950 mm.

M64058 PALIN, graduated scale for adjustment

M64059 PALIN D, digital measurement display with fine adjustment, batteries included

Coolant spray device. Use of a coolant spray device is recommended when working with plastics with a low melting point and for certain light metal alloys. Your Altendorf will cut so aluminium and plastics cleanly, with sharp contours, to within a tenth of a millimetre.

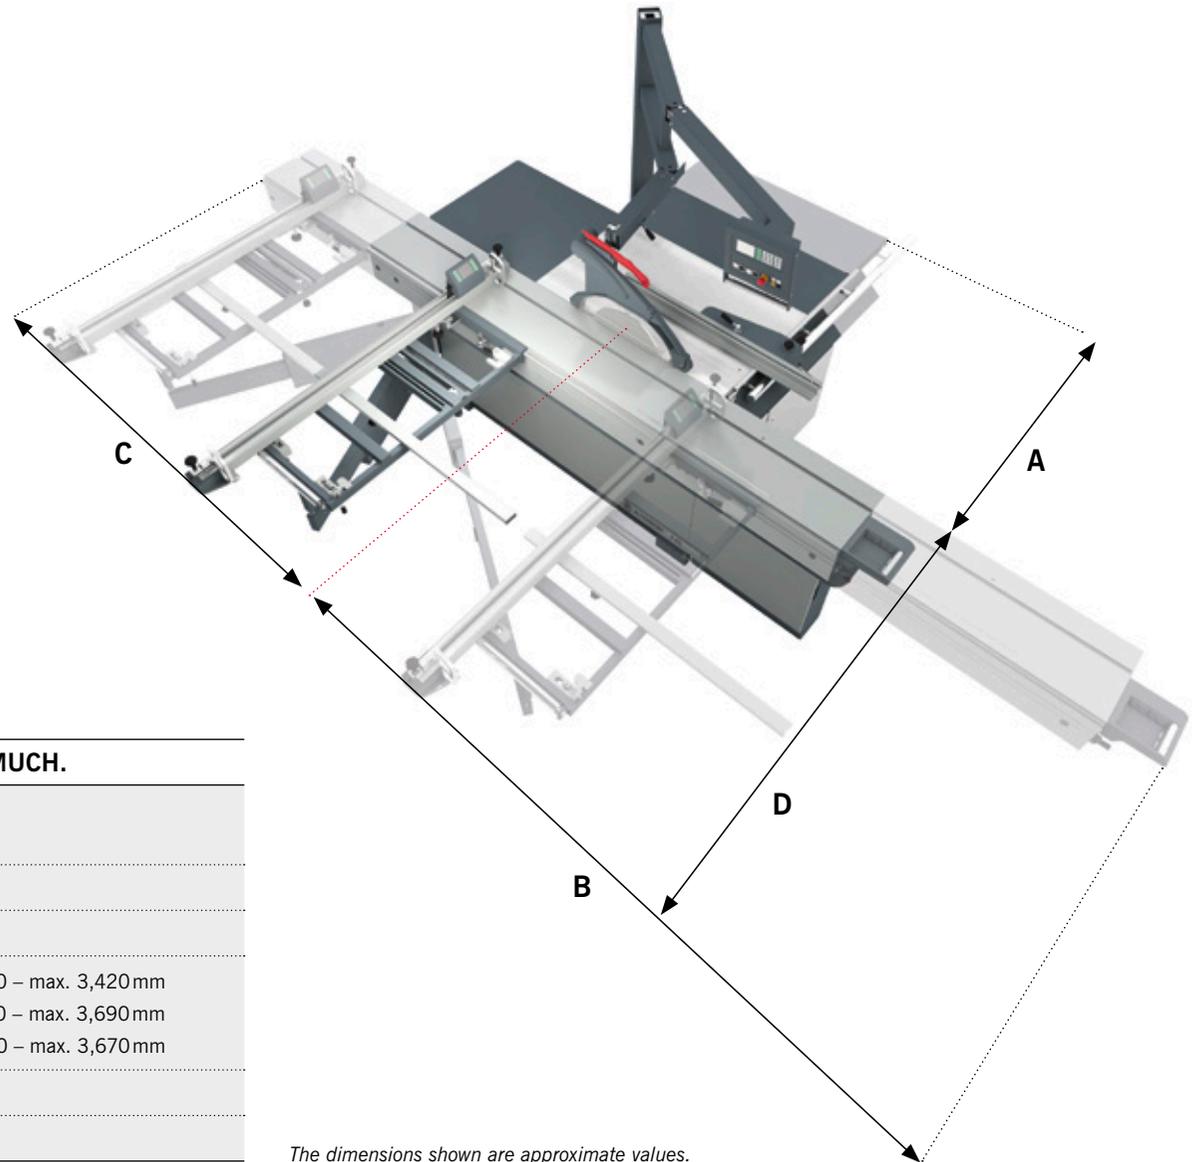

M64067

Laser cutting line marker. The laser cutting line marker shows the cutting line clearly for all cut lengths, which is useful when trimming or cutting marked jobs such as steps. Use it to save both time and materials.

M64066

TECHNICAL SPECIFICATIONS

YOUR F45 NEEDS SPACE. SEE BELOW TO FIND OUT HOW MUCH.

A	Manual adjustment: cutting width + 280 mm Motorised adjustment: cutting width + 360 mm
B	Table length + 360 mm
C	Table length + 290 mm
D	Crosscut fence: 1,890 – max. 3,420 mm Crosscut-mitre fence and parallelogram cross slide: 1,960 – max. 3,690 mm UNO/DUO CNC crosscut fence: 2,200 – max. 3,670 mm
	Machine weight starting at 1,170 kg, depending on configuration
	Table height 910 mm, 880 mm or 850 mm

The dimensions shown are approximate values.

SLIDING TABLE CUTTING LENGTHS Maximum cutting lengths when using clamping shoe or crosscut fence. Not in conjunction with crosscut fence, stops to 2,500mm.

Table length (mm)	2,250	3,000	3,200	3,400	3,800	4,300	5,000
Cutting length (mm) with WA, WGA, PQS and UNO	2,155	2,905	3,105	3,305	3,705	4,205	4,205
Cutting length (mm) with DUO and DUO Flex	2,100	2,850	3,050	3,250	3,650	4,155	4,155

TIP-SERVO-DRIVE

Cutting length (mm) without scoring saw blade	1,840	2,590	2,790	2,990	3,390	3,870	3,870
Cutting length (mm) with scoring saw blade	1,725	2,475	2,675	2,875	3,275	3,775	3,775

MAXIMUM SAW BLADE PROJECTION ¹⁾ Scoring tool must be removed. ²⁾ Not compatible with scorer unit. ³⁾ No restriction with three-axis scorer unit.

	One-way			Two-way tilt		
Saw blade diameter (mm)	450 ³	500 ³	550 ³	450 ¹	500 ¹	550 ¹
Saw blade projection 90°	154	179	204	154	179	204
Saw blade projection +45°	105	123	141	98	115	132
Saw blade projection -45°	—	—	—	69	86	103

ELECTRICAL POWER REQUIREMENTS

	One-way tilt				Two-way tilt with VARIO		
Motor (kW)	4	5,5	7,5	11	VARIO	5	6,5
Voltage (V)	380-420	380-420	380-420	380-400	380-400	380-400	380-400
Frequency (Hz)	50	50	50	50	50	50	50
Current (A) without/with scorer	8/10	11.5/13.5	15.5/17.5	22.5/24.5	11/13	11/13	15/17
Fuses	20	25	25	35	35	35	35

DUST EXTRACTION CONNECTIONS

Top connection	Ø = 80 mm
Bottom connection	Ø = 120 mm
Pressure drop	1,200 Pa with a total connection diameter, Ø = 140 mm
Minimum air requirement	V _{min} = 1,110 m ³ /h at 20 m/sec

AIR CUSHION TABLE

Compressed air consumption	200l/min at 1 bar (max 400l/min at max 3 bar)
----------------------------	---

The cross section of the mains cable depends on the machine's distance from the power source and must be determined by a qualified electrician (Power drop in the input cable ≤ 3%). For VARIO machines: RCD protection type B, all current (AC/DC) sensitive. The minimum cross section of the mains cable for machines with VARIO motor is 4x4mm². Please contact your Altendorf sales partner if your power supply does not match the requirements shown. Workstation noise level 84.1 dB (A).

RELIABLY AT YOUR SIDE WITH EXPERTISE AND A PERSONAL TOUCH:

THE ALTENDORF SERVICE TEAM

Our team of Altendorf service engineers, customer advisors and sales staff provides a rapid and uncomplicated response to every customer enquiry. Typically over 90% of enquiries are resolved successfully at the first attempt. We can help you even faster over the telephone if you register your saw with us in advance. Our experienced field service team and numerous trained specialist dealers ensure continuous customer care worldwide.

The Altendorf Service Hotline: +49 (0)571 9550 222

ALTENDORF INSPECT: THE HEALTH CHECK FOR YOUR SLIDING TABLE SAW

ALTENDORF INSPECT.

Altendorf saws are built to run and run. Even the best saw needs a little care now and again though, which is why we created Altendorf Inspect: the health check for your Altendorf sliding table saw. An Altendorf service engineer will give your saw a thorough examination, establishing whether any of the parts subject to wear need to be replaced, reviewing the basic settings of your saw and checking all machine functions, all for an eminently affordable fixed price. Our only additional charge will be for any replacement parts required.

ALTENDORF ONLINE: EQUALLY GOOD WITH PC, TABLET OR SMART PHONE.

YOUR CONSTANT LINK TO YOUR F45.

The Altendorf website works equally well on PC, tablet or smart phone: Machine images and text are automatically adapted to suit your device. Discover your F45 – no matter where you are. And of course all other Altendorf machines and offers as well: training, guarantees, maintenance and other services. Keep in touch!

BRINGING FRIENDS OF THE COMPANY TOGETHER:

WELCOME TO THE ALTENDORF FORUM!

The Altendorf Forum is the way to keep in touch with your friends at Altendorf. Be the first to find out about new developments and take advantage of the chance to communicate directly on technical matters with Altendorf staff and other industry experts. Meet specialists in different settings and for different purposes: a trade fair, a conference or a specific occasion such as a new product presentation, a new service or a special campaign. Your membership card ensures that you will always be involved whenever Altendorf has something particularly important to share.
