

POWERSPLIT 1250

The flexible saw with high capacity
for maximum use of resources

WEINIG PowerSplit 1250: For highest capacity

150 m/min feed speed, smallest possible kerf, perfect accuracy, quick settings and safe feed-through for the PowerSplit single and twin is an unbeatable combination. Our focus on production reliability and service friendly design gives you maximum security.

PowerSplit 1250 band resaw:

- Feed speed up to 150 m/min
- Electronic feed
- Cast iron base and pillars
- Motorized tilt of upper saw wheel
- Fence and center cut
- Motorized band tensioning
- Effective band and wheel clearing
- Single or twin – both with fence side to the left or right

1 Operator panel

All electrical functions on the saw can be set from the standalone panel, which can be placed according to the layout of the plant. The panel includes a PLC with capability to store 30 pre-programmed dimensions.

3 PowerSplit versions

The PowerSplit can be flexibly adapted to your production - as single or twin version. Available in right and left hand versions. In addition, the fence side can be chosen freely for the single and twin version.

2 Frequency controlled feed

The high feed speed is ensured by six feed rollers, each of which is equipped with a pneumatic clamping system. The feed unit can also be adjusted forwards for optimum sawing quality. Bevel cutting is available as an option.

4 Band saw blade guides

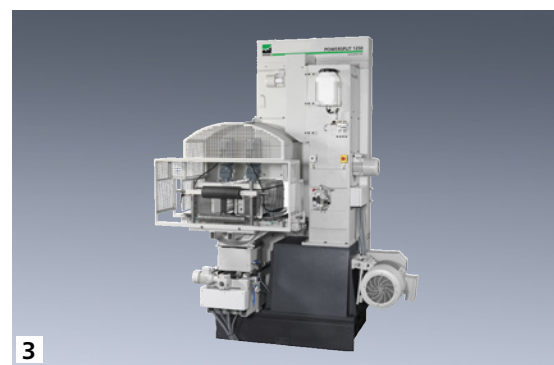

The solid upper and lower band saw blade guides can be easily replaced without adjustment. The upper band saw blade guide is height-adjustable to suit different cutting heights. The automatic position control and monitoring of the band saw blade is already included as standard.
